

Oxygen Administration Tubing

Product Data Sheet

Product Codes	See table below
Description	Oxygen Administration Tubing for connecting oxygen source to patient.
Intended Use	'Oxygen administration tubes are non-sterile, single use devices intended to provide an additional length of tubing between the oxygen source and patient oxygen delivery device, in patients requiring supplementary oxygen from adults to paediatrics in both clinical, ambulatory, and home care environments. The device will be used by clinicians, trained home carers and patients, in hospitals, clinic, homecare, or any areas for personal use.
Product Information	Available in non-sterile Coils and Cut Lengths Coils - available in 30m and 50m lengths and supplied in convenient dispenser bag. Funnel ends can be easily cut to fit most oxygen therapy devices. Pre-cut lengths - available in 1.8m and 2.7m lengths, supplied in polythene pack.
Materials	Tubing - PVC (DEHP Free) Latex Free
Quality System	ISO 13485
EU Device Classification	Class IIa
Box Qty	See table below
Packaging	Packed non-sterile into individual polythene packs
Shelf Life	5 years
Storage & Safety	Toxicity: Manufactured from biocompatible materials Storage: Store in a clean, cool, dry place away from direct sunlight

Oxygen Administration Tubing - Coil

Oxygen Administration Tubing - Cut Length
